Subject: Letter of Recommendation.

Enpath had taken on a large project to consolidate 3 buildings into one manufacturing facility. We were on a tight budget and we had over 500 wires to run to connect our computers and phone system. All State provided very good ideas and then executed the plan. They provided timely installation and their attention to detail was excellent. Their work is very neat and well documented. All we had to do is patch the connection to our switches.

Our building project was running behind on just about every phase of the building. All State was given less time than originally planned and they came through and gave us the attention we need to be back on schedule. When changes were made they supported us with nearly instant results.

It was a pleasure working with all the personnel from the managers to the workers.

Thanks for a very good job.
